Highly ambitious junior software developer with experience in frontend, backend and full-stack development. Over 2 years of experience in retail management with the ability to work collaboratively and effectively in teams and achieve a consistent level of high standards in fast-paced environments. Currently studying Professional Software Development at CodeClan Glasgow and working as a Deputy Store Manager at ALDI.

Professional Software Development - CodeClan
January 2023 - Current
Skiils I have learnt whilst doing this course Include: Python, Flask, PSQL, JavaScript, React, Mongodb, Express, node.js, Java, Spring, Git, CSS and HTML.

Projects

PetClan - *https://github.com/Lewish1998/Project_1*
• A full stack web application created using Python's Flask and PSQL.
• Allows users to create, remove, update and delete users and pets and their respective information.
• Styled using CSS

Wizarding Wiki - *https://github.com/Lewish1998/Project_2_Wizarding_Wiki*
• A collaborative project brought together with the use of git and GitHub.
• An informative educational application created using React which uses API's to display data.
• Effective planning and communication to achieve MVP and adapt the project.
• Use of agile methodology to create functional versions of additional features.
• Responsive frontend elements using flex box and grid allowing for a good user experience.
